Product flowing through each pipe: _____

Underground Duct Banks (red concrete), conduit & unprotected wiring

Size (width, depth & diameter): _____

TOP elevation: _____

Person who performed probing:

Name: _____ phone number: _____

Signature: _____

Probing **SHALL** start at grade level on every excavation

NOTE: Elevated areas like dike walls, backfill above grade, etc. is not grade level. Workers shall determine grade level prior to breaking the grade surface and once identified follow probing requirements. Refer to PR-04 Excavation Policy for further details of the expectations.

Probe results must be provided to the Servicing Group Supervisor. Servicing Group Supervisor will ensure results are provided to Information Management to update the Master Plot Drawing in ePlot. A copy of the results SHALL stay with the PR-4A excavation permit.

The probe card shall stay with the excavation permit during the excavation activity. Both the Probe Card and Excavation Permit will be submitted to the MPC coordinator, or MPC Maintenance supervisor once the excavation work is complete.
