#### **TAG NAME(S)** – Asbestos Homogenous Area

**UNIT –** Galveston Bay Refinery Unit / Complex

**SERVICE** - Asbestos Materials

#### 1. SCOPE / PURPOSE

This procedure details the steps to maintain oversight of asbestos activities that include asbestos abatement work including any removal or demolition work being performed at the unit in which they have the responsibility to ensure the work is conducted in accordance with the provision of the Asbestos NESHAP and Consent Decree.

### 2. REQUIREMENTS

#### a. RISK/SAFETY

Hazard	Control Measure
Body Mechanics	Awareness of area for body positioning when reviewing conditions of insulation
Gravity, Working at heights	Proper fall protection and securing of materials when elevated to prevent falling
Noise	Proper hearing protection
Radiation / Sunlight	Proper coverage of exposed skin
Thermal / hot equipment or piping	Awareness when in close proximity to areas of inspection

#### b. MATERIALS

No special materials required

#### c. SPECIAL TOOLS

No special tools required

#### 3. REFERENCES

- a. SM-3 Asbestos Management Policy
- **b.** ENV-30 Asbestos Disposal Policy
- **c.** Asbestos Compliance Information Management System (ACIMS) Unit Homogeneous Area Listing
- **d.** Annual asbestos O & M notifications.
- e. OSHA/ EPA/ NESHAP/ TDSHS Regulations

#### 4. SKILLS/TRAINING/TIME

- a. Asbestos Contractor/ Supervisor Accreditation for Certification in U.S. EPA/Texas DSHS approved training courses and periodic refresher courses required by 40 CFR part 763, Subpart E, Appendix C-Asbestos MAP.
- **b.** Asbestos Building Inspector Accreditation for Certification in U.S. EPA/Texas DSHS approved training courses and periodic refresher courses required by 40 CFR part 763, Subpart E, Appendix C-Asbestos MAP.
- **c.** Initial 40-hour Training for Asbestos contractor/supervisor and yearly 8-hour refresher after 1rst year by EPA/TDSHS certified trainer
- **d.** Initial 24-hour Training for Asbestos contractor/supervisor and yearly 4-hour refresher after 1rst year by EPA/TDSHS certified trainer
- **e.** Duration of Activity variable based on amount and location of each Homogenous Area from 10 minutes to 1 hour per assessment

### 5. Departures

The Asbestos Compliance Manager must approve all departures from this procedure. On the reverse side of the document, list the step number, reason for the departure and any recommendations regarding the need for procedure revision. The Supervisor will initial the departure written on the reverse side of the document.

## 8. PREREQUISITES

The following procedures and activities are to be completed before this procedure is performed. Verify and sign off each item.

Step	Description of Task	Initials
1	Confirmation of Asbestos work being performed in their unit by schedule or Work Order process.	

#### 7. TASKS

The key steps below are sequenced to ensure safety of site personnel, environmental compliance, and prevent equipment damage. The Accredited Asbestos Supervisor/Inspector performing each step shall enter their initials in the appropriate space before going on to the next task. This is done to verify the completion of each step.

Step	Description of Task	Initials
7.1	Ensure a permit has been issued for Asbestos Work Activity.	
7.2	Ensure proper accredited Asbestos Competent Person and asbestos work personnel are performing the asbestos work (Approved Asbestos Contractor/ 3rd Party for air monitoring).	
7.3	Ensure proper notifications to regulatory (TDSHS) are in place.	

Printed 7/16/2025 Page **3** of **11** 

Blanchard Refining Company LLC	Galveston Bay Refinery	
Title: Asbestos Oversight	Doc Number: RMP-REP-000015-GB	Rev No: 3

Step	Description of Task	Initials
7.4	Perform Managerial Oversight of Asbestos work by random checks during the asbestos activities being performed in their unit of accountabilities or ensure designated "support" to the unit Designated Asbestos Supervisor are being followed.	
	Note: Use <u>Attachment B</u> , Asbestos Oversite Checklist for guidance. Ensure On-Site Records/ Documents, Abatement Practices and Procedures and Waste Disposal procedures are being followed and documented.	
	Note: The Designated Asbestos Unit Maintenance Supervisor will immediately take all necessary actions to correct any violations of the Asbestos NESHAP that are discovered. If an immediate remedy is not possible, the Designated Unit Maintenance Supervisor shall stop all asbestos work until violations are reported to Asbestos Compliance Manager and corrections are made.	
7.5	Perform final inspection in the ACM-free <b>Attachment A</b> , Asbestos Final Inspection Report at end of activities involving asbestos.	

End of Procedure

# 8. REQUIRED DOCUMENTATION
