

# Connectivity for Contractor Mobile Devices

Private LTE (pLTE) is available to provide approved field connectivity inside Marathon refinery facilities

## WHY USE pLTE?

Enhanced field connectivity inside the fenceline

Access approved applications and refinery resources

Supports digital work execution, mobility, and productivity

Available for individual users or large contractor mobilizations

**AVAILABLE TO USE | NOT REQUIRED**

Contractors may continue using their existing connectivity methods if preferred.

## KEY INFORMATION

### OPTIONAL SERVICE

Available to use.  
Not required.

### BAND 48 COMPATIBLE

Devices must support LTE Band 48.

### eSIM CAPABLE

Devices must be eSIM compatible.

### CARRIER UNLOCKED

Devices must be carrier unlocked.

### KEEP DEVICES UPDATED

Operating system and firmware must be current.

### REQUESTING SERVICE

Submit requests through your Marathon representative. Provisioning typically completed within one business day after approval.

### MULTI-SITE PROJECTS

Service is requested for a specific location. If you need connectivity at multiple Marathon sites, coordinate requirements early with local IT.

### TURNAROUNDS

Bulk onboarding is recommended for turnarounds and large contractor mobilizations. Plan ahead for a seamless experience.
